

October 17, 2020

The November 2020 schedule has been posted online. Due to COVID-19 numbers dropping significantly in our state as well as our city, we are approving all students to return to campus with their contracted school schedule.

New students starting on October 26, 2020 will complete and submit their IBC COVID-19 Training packet, their negative COVID-19 test result, and their Barbicide COVID-19 and Barbicide Certifications (prior to their first day of school)

We have added additional safety precautions:

1. Dividers between student stations
2. Client temperature checking upon arrival as well as additional waiver of liabilities that provide accurate yes or no health checklists
3. Clients can no longer give the student cash in hand but must place the student tips in the envelope we provide and then hand the cash to the student
4. Clients that have children are not allowed to wait in the clinic floor classroom, they must wait outside
5. All clients waiting for their services must do so outside, clients cannot wait inside
6. We are continuing to monitor the bodies indoors and seeing that the 6 ft social distancing is still strongly respected as well as the proper PPE to be worn by students, employees, and clients always
7. Appointments for services have been removed at this time
8. If anything changes, we will make the proper adjustments and continue to document and report

Currently, we continue to have ZERO positive covid-19 test results
